

Installation and Lifecycle Services
MODERNIZATION

INSTALLATION AND LIFECYCLE SERVICES

A wide range of installation and lifecycle services for your industry processes and machinery.

At Makron, we want to serve you through the lifetime of your production or industrial processes. Our lifecycle services cover both industrial automation and mechanics. We aim to ensure that your production runs smoothly with the minimum possible downtime. We offer you industrial lifecycle services from installation and commissioning to maintenance and spare part deliveries, either as a whole or as individual services. Modernization prolongs the lifecycle of the production line. We aim to maintain your productivity, safety, environmental friendliness and efficient operation.

MODERNIZATION

Modernization improves the operation of a production line or machine and prolongs its lifecycle. Modernizing the existing line is often a cost-effective alternative to an entirely new line. When you need to modernize your plant, production line, or a specific machine, contact us. Makron helps make your processes as reliable, efficient and safe as possible.

What Makron does

We update your production lines and machines so that you can meet future challenges. We have strong competence in all aspects of modernization. Our know-how covers both industrial automation and mechanics, and we serve you as a full-service partner.
