SURFACE TREATMENT

PRODUCTION

We are experts in industrial project business based machine manufacturing.

Makron is your one-stop solution provider in machine manufacturing. We handle different projects from your designs and drawings to a complete working product. Working together with Makron means you have high-quality expertise and professionals providing you with the best possible service. We value the quality of our work and therefore we thoroughly document production. We are able to obtain all the needed parts, components, and materials for you. We are happy to take complete responsibility for the supply chain, to stay on schedule and get the necessary components on time. Our work plans ensure that every step of the process is planned carefully. During the production process, we will also report on our progress, step-by-step, to keep you up-to-date. And we constantly develop our products and production processes. We appreciate hands-on partnership where we learn from each other to make projects more efficient and products better.

SURFACE TREATMENT

We perform different types of surface treatment from steel grit blasting to high-quality wet painting. We have blasting lines where completion can be done to create a clean and smooth product surface according to specifications. Makron's spacious painting halls are suitable for painting large steel structures.

What Makron does

We have excellent facilities for high-quality surface treatment. In our painting hall, the surface of the product can be specially finished, for example to meet corrosion resistance requirements. We can perform multiple wet paintings for demanding structures. In these situations, the end-product will have a surface treatment of 40–700 µm thick. We document each surface treatment digitally so you can trust the quality of the end-product. We finish your product surfaces according to precise field standards.

Machinery & Services

- Steel grit blasting
 - Wet painting
 - Digital documentation
