

MAKRON

A Promise to Complete.

Engineering and Design

FULL-SCOPE DELIVERY

MAKRON

A Promise to Complete.

ENGINEERING AND DESIGN

Mechanical engineering and design proficiency, with the technical calculations to fit your needs.

Our experienced industrial engineers design technically sound machines and production lines for you. We offer high-quality mechanical engineering and technical calculation services, and we can also manufacture the machines and handle the full-scope of delivery. With Makron, you always get great customer service and project management. We choose the right employees, with the right expertise and know-how, to meet your needs. Our experts have the skills to take responsibility for the entire product development process, from idea to production.

FULL-SCOPE DELIVERY

Our full-scope delivery offers you complete engineering know-how at all levels. Because we have in-house manufacturing competence, we can also support you in coordinating the manufacturing phase. With our full-scope deliveries we manage all phases from engineering design to installation and commissioning.

What Makron does

Our engineers are professionals with a high level of engineering knowledge and a customer service mindset. We can help you across the full scope of delivery, including designs, drawings, analyses and project management. You can get everything from Makron.
