BUILDING CONSTRUCTION INDUSTRY

Production technology for recycled cellulose insulation as well as machine manufacturing for precast concrete production.

Makron offers complete production technology to meet your specific demands in the building construction industry. We are specialized in recycled cellulose insulation production technology and machinery. Makron has developed these production lines through the input from our long-term customers. Our know-how covers engineering and design, production, industrial automation and lifecycle services. We also manufacture machines for precast concrete production for the machinery technology provider Elematic as a subcontracting partner.

PACKING

The finished material, recycled cellulose fiber insulation, can be packed using different packaging technologies depending on your production capacity and needs. Makron's packaging process packs the fiber into paper or plastic bags and presses all the air out to make the package compact and ready to transport.

What Makron does

Makron's packing systems include surge bins and packing machines, and the cellulose insulation products can be packed in either paper or plastic bags. The plastic packages can be made from either plastic bags or plastic foils.

Technical Data

Automated packing into plastic bags

Capacity	approx. 2–3 bags/minute
Bag size	approx. 800 x 400 x 325 mm
Density	approx. 150 kg/m ³
Weight	13–15 kg (adjustable)

Manual packing into plastic or paper sacks

Package dimensions	approx. 100 x 50 x 25 cm
Diameter of the inlet	130 mm
Density	approx. 120 kg/m ³
Weight	13–15 kg
