# BUILDING CONSTRUCTION INDUSTRY

## Manufacturing technology for log home and recycled cellulose insulation.

We offer better technology to build better. We offer complete manufacturing technology, production lines and single machines to meet your specific demands in the building construction industry. We are specialized in production lines for wood-based materials, log house manufacturing and recycled cellulose fiber insulation manufacturing technologies and machinery. Makron has developed these machines through the input from our long-term customers. We also manufacture machines for precast product manufacturing for machinery technology provider Elematic as a subcontracting partner.

---

# PRECAST CONCRETE MANUFACTURING MACHINERY

Precast is one of the world's most common building materials. Precast has a complete set of benefits featuring energy efficiency, easy and cost-efficient construction, seismic durability, tolerance in variable weather conditions, and it can actually be made in any shape and color. We at Makron manufacture machinery as a subcontractor for the precast concrete manufacturing technology provider [Elematic](#).

## What Makron does

We manufacture machines as a subcontractor for the technology provider Elematic, from processing equipment and machines to complete lines for precast concrete manufacturing factories. This includes different conveyors, casting machines, saw lines and molds for aerated concrete manufacturing.

## Products & expertise

- Conveyors
  - Casting machine manufacturing
  - Saw manufacturing
  - Mold manufacturing
  - Electrical control cabinets
  - Mechanical engineering
  - Automation engineering
  - Electrical engineering
  - Electrical installations
