Building Construction Industry

TRASH SEPARATION
BUILDING CONSTRUCTION INDUSTRY

Production technology for recycled cellulose insulation as well as machine manufacturing for precast concrete production.

We offer complete production technology to meet your specific demands in the building construction industry. We are specialized in recycled cellulose insulation production technologies and machinery. Makron has developed these production lines through the input from our long-term customers. We also manufacture machines for precast concrete production for the machinery technology provider Elematic as a subcontracting partner.

TRASH SEPARATION

After crushing, the material is moved to trash separation where all remaining metal and heavy particles are separated.

What Makron does
After pre-crushing, metal and heavy particles are removed using a magnet and Makron’s heavy particle separator.
