BELT CONVEYORS

CONVEYOR TECHNOLOGIES

Conveyor solutions for your industrial needs.

Innovative conveyor solutions streamline and enhance industrial processes. Makron combines strong automation and production expertise with decades of experience in conveyor technologies. The conveyor systems have been developed to meet the specific industrial needs, whether for intralogistics or production lines. Our products are engineered to streamline your processes and boost operational efficiency. Our conveyors are not only efficient but also represent the highest standards in reliability and safety. We take pride in delivering solutions that meet highest industry requirements, ensuring you have the peace of mind that comes with top-tier, consistent performance.

BELT CONVEYORS

Dynamic and efficient, our belt conveyors embody versatility and automation, seamlessly facilitating the smooth flow of materials with precision and reliability. They are suitable for various transportation needs either as separate machines or as complete conveyor lines. The conveyors are always designed according to the customer's needs.

What Makron does

The size of a belt conveyor is determined by the product that is being transported. Enhancements such as guides, side rails, belt cleaners, and positioners can be seamlessly integrated to optimize performance and streamline operations.
