Conveyor Technologies

CHAIN CONVEYORS

CONVEYOR TECHNOLOGIES

Conveyor solutions for your industrial needs.

Innovative conveyor solutions streamline and enhance industrial processes. Makron combines strong automation and production expertise with decades of experience in conveyor technologies. We design and deliver conveyor systems tailored to your needs, whether for intralogistics, production lines, or the handling of recyclable materials. Our conveyor systems support automation, improve safety, and optimize space utilization. We also support technology providers with our conveyor technology expertise. Our specialties include special conveyors for demanding environments and challenging materials when a basic solution isn't enough.

CHAIN CONVEYORS

Chain conveyors are a robust solution for the efficient transportation of bulk and load goods in different industries such as timber processing and the handling of lengthy items. Makron's chain conveyors are designed to withstand the rigors of heavy-duty applications.

What Makron does

Our conveyors are built to last, ensuring long-term performance and minimal maintenance requirements. The robust construction of our conveyors withstands the demands of demanding industrial environments.
