# CONVEYOR TECHNOLOGIES

## Conveyor solutions for your industrial needs.

Innovative conveyor solutions streamline and enhance industrial processes. Makron combines strong automation and production expertise with decades of experience in conveyor technologies. The conveyor systems have been developed to meet the specific industrial needs, whether for intralogistics or production lines. Our products are engineered to streamline your processes and boost operational efficiency. Our conveyors are not only efficient but also represent the highest standards in reliability and safety. We take pride in delivering solutions that meet highest industry requirements, ensuring you have the peace of mind that comes with top-tier, consistent performance.

## TRAVERSES

Traverses provide a precise solution for material handling, whether you're conveying single items, pallets, or even heavy loads. By minimizing manual handling, they not only enhance efficiency but also reduce the risk of injuries, fostering a safer work environment. Moreover, their ability to automate sorting processes significantly boosts productivity and throughput.

### What Makron does

Each traverse is custom-designed to meet the specific requirements and space constraints making them ideal for even the most complex and demanding settings.
