TROUGH-BELT CONVEYORS

CONVEYOR TECHNOLOGIES

Conveyor solutions for your industrial needs.

Innovative conveyor solutions streamline and enhance industrial processes. Makron combines strong automation and production expertise with decades of experience in conveyor technologies. The conveyor systems have been developed to meet the specific industrial needs, whether for intralogistics or production lines. Our products are engineered to streamline your processes and boost operational efficiency. Our conveyors are not only efficient but also represent the highest standards in reliability and safety. We take pride in delivering solutions that meet highest industry requirements, ensuring you have the peace of mind that comes with top-tier, consistent performance.

TROUGH-BELT CONVEYORS

Trough-belt conveyors are superior solutions for bulk material handling. From solid waste to pellets and sand, our trough-belt conveyors offer unparalleled reliability.

What Makron does

Engineered for bulk material handling, our trough-belt conveyors are built to last. The frame is constructed from 6mm steel, and the belt is made from high-quality rubber, known for its durability and reliability.
