

MAKRON

Conveyor Technologies

WAREHOUSE SOLUTIONS

CONVEYOR TECHNOLOGIES

Conveyor solutions for your industrial needs.

Innovative conveyor solutions streamline and enhance industrial processes. Makron combines strong automation and production expertise with decades of experience in conveyor technologies. We design and deliver conveyor systems tailored to your needs, whether for intralogistics, production lines, or the handling of recyclable materials. Our conveyor systems support automation, improve safety, and optimize space utilization. We also support technology providers with our conveyor technology expertise. Our specialties include special conveyors for demanding environments and challenging materials when a basic solution isn't enough.

WAREHOUSE SOLUTIONS

We design storage solutions that are suitable for your products and meet your specific business requirements. In addition, we can also provide integrations into production control systems as well as warehouse management software.

What Makron does

Makron offers storage solutions for specific needs. You get a complete warehouse solution designed according to your products and operations.
