

Engineering and Design

MECHANICAL ENGINEERING

ENGINEERING AND DESIGN

Mechanical engineering and design proficiency, with the technical calculations to fit your needs.

Our experienced industrial engineers design technically sound machines and production lines for you. We offer high-quality mechanical engineering and technical calculation services, and we can also manufacture the machines and handle the full-scope of delivery. With Makron, you always get great customer service and project management. We choose the right employees, with the right expertise and know-how, to meet your needs. Our experts have the skills to take responsibility for the entire product development process, from idea to production.

MECHANICAL ENGINEERING

Makron's engineering team delivers complete knowledge of industrial machines, steel structures and pressure vessel engineering and design. Our competences cover a range of industrial areas, including the latest engineering tools. When you need engineering services, whether it is a small assignment or a complete machine design process, our highly educated and professional team is at your service. Our mechanical engineering services cover all phases of the product lifecycle from concept design to product renewal.

What Makron does

We offer you mechanical engineering and technical calculations to optimize your industrial processes. We provide you with complete documentation for manufacturing and user manuals.

Products & expertise

- Industrial machine design
- Steel structure design
- Risk analysis
- Technical drawings
- Engineering analysis
- Production optimization
- Pressure vessel engineering
- Documentation
