

Engineering and Design

PLANT AND PROCESS ENGINEERING

ENGINEERING AND DESIGN

Mechanical engineering and design proficiency, with the technical calculations you need.

Our experienced industrial engineers design technically sound machines and production lines for you. We offer high-quality mechanical engineering and technical calculation services. With Makron, you always get great customer service and project management. Makron can also manufacture the machines and handle the full-scope of delivery. We choose the right employees, with the right expertise and know-how, to meet your needs. Our experts have the skills to take responsibility for the entire product development process, from idea to production.

PLANT AND PROCESS ENGINEERING

It is important to design well-functioning factories to ensure that your manufacturing processes run smoothly and efficiently. Our engineering team has expertise in factory and pipeline layouts and we can help you optimize your industrial space to achieve greater efficiency. We design process flow diagrams, piping and instrumentation diagrams, and production layouts. We also offer load analysis for structural design purposes.

What Makron does

With professional analysis, we help you clarify your industrial processes and enhance your operations. We complete your factory's layouts, piping layouts, and all needed calculations.

Products & expertise

- Factory and production layouts
 - Process flow diagrams
 - Load analysis for machine foundations
 - Piping and instrumentation diagrams (P&ID)
 - Pipeline layouts
 - Pipeline calculations
