PRODUCT DEVELOPMENT

ENGINEERING AND DESIGN

Mechanical engineering and design proficiency, with the technical calculations you need.

Our experienced industrial engineers design technically sound machines and production lines for you. We offer high-quality mechanical engineering and technical calculation services. With Makron, you always get great customer service and project management. Makron can also manufacture the machines and handle the full-scope of delivery. We choose the right employees, with the right expertise and know-how, to meet your needs. Our experts have the skills to take responsibility for the entire product development process, from idea to production.

PRODUCT DEVELOPMENT

We serve you with complete product development services. We have a flexible team of professional engineers who can co-operate with you on everything from smaller projects involving products, machines and facilities, to wider-ranging projects, which take an initial idea all the way to a completed end product. We have decades of experience in developing our own technologies. We design sustainable, energy- and material-efficient solutions.

What Makron does

We offer our expertise in industrial machinery design and development. We can help you with any scope you need, from conceptual design to complete product development process. In modernization projects, we support you in improving the features of your machine.

Products & expertise

- Product development
- Technical and mechanical consultation
- Product testing
