

MAKRON

A Promise to Complete.

Engineering and Design

PRODUCT DEVELOPMENT

ENGINEERING AND DESIGN

Mechanical engineering and design proficiency, with the technical calculations to fit your needs.

Our experienced industrial engineers design technically sound machines and production lines for you. We offer high-quality mechanical engineering and technical calculation services, and we can also manufacture the machines and handle the full-scope of delivery. With Makron, you always get great customer service and project management. We choose the right employees, with the right expertise and know-how, to meet your needs. Our experts have the skills to take responsibility for the entire product development process, from idea to production.

PRODUCT DEVELOPMENT

We serve you with complete product development services. We have a flexible team of professional engineers who can co-operate with you on everything from smaller projects involving products, machines and facilities, to wider-ranging projects, which take an initial idea all the way to a completed end product.

What Makron does

Our team handles the complete product development process from the first sketch to the finished product, machine, or factory, using their deep understanding of engineering and design.

Products & expertise

- Product development
- Technical and mechanical consultation
- Product visual and ergonomic design
- Product testing
