AUTOMATION ENGINEERING

INDUSTRIAL AUTOMATION

Industrial automation optimizes the functionality of machines and systems.

With efficient automation you can control, operate and monitor your machines seamlessly, and you can improve your cost and production efficiency, too. Makron industrial automation covers everything from the planning and programming of control systems, to electrical installations, commissioning, and installation supervision, as well as lifecycle services. Our electrical control cabinet manufacturing covers a wide range of products and industrial applications. Our automation enables heavy production work to be performed by robots and machines, for a safer and more efficient working environment. Makron automation also improves accountability, production reporting, and preventive maintenance. We can support you wherever you are located with our remote access systems. We offer you our industrial automation expertise as individual services or together with our machine manufacturing service. We have over 30 industrial automation professionals ready to help.

AUTOMATION ENGINEERING

Makron industrial automation helps you to maintain high levels of performance and productivity in your industrial processes. Our automation engineers design and manufacture user-friendly products and user interfaces with advanced functionality, to ensure the optimum usability. Makron's skilled experts can also take responsibility for entire automation development projects, all the way from first idea to working production.

What Makron does

Our automation professionals are at your service! We provide customers like project suppliers, machine and equipment manufacturers, manufacturing companies, and marine industry suppliers with different aspects of automation design, either as a whole package or as individual services, according to their needs. Our implementations are industrial logic- and data-based control systems, which are designed with the user in mind.

Products & expertise

- Automation design
- Electrical planning
- PLC design
- HMI design
- PC interfaces
- Database design
- IoT solutions
- System descriptions

- Instrumentation
 - Documentation
 - Consultation
