ELECTRICAL INSTALLATIONS

INDUSTRIAL AUTOMATION

Industrial automation optimizes the functionality of machines and systems.

With high-quality automation solutions you can control, operate and monitor your machines and processes seamlessly. Modern industrial automation solutions improve your production or intralogistics efficiency and enable a safe working environment. Makron industrial automation covers everything from the planning and programming of control systems, to electrical control cabinet manufacturing, electrical installations, commissioning, and lifecycle services. We can offer our expertise in modernization or digitalization projects and provide you with robotics and machine vision solutions. We integrate systems to support your business. You can entrust all development and maintenance of your automation systems to us as your long-term automation partner.

ELECTRICAL INSTALLATIONS

We offer automation and electrical installation services for various industries. Electrical installation is typically a part of our contract manufacturing project. Our offering consists of range of installations required for industrial electricity and instrumentation, including field installation and installation supervision. We offer electrical installations and installation supervision as a service all over the world.

What Makron does

Our professionals have the competence and know-how to install the manufactured machinery fast, efficiently, and safely. Some electrification can be pre-installed in manufacturing and completed on-site. Our experienced electricians can also act as project supervisors.

Products & expertise

- Industrial electricity installations
 - Industrial automation installations
 - Field electricity installations
 - Supervision of electrical installations
