ELECTRICAL INSTALLATIONS

INDUSTRIAL AUTOMATION

Industrial automation optimizes the functionality of machines and systems.

With efficient automation you can control, operate and monitor your machines seamlessly, and you can improve your cost and production efficiency, too. Makron industrial automation covers everything from the planning and programming of control systems, to electrical installations, commissioning, and installation supervision, as well as lifecycle services. Our electrical control cabinet manufacturing covers a wide range of products and industrial applications. Our automation enables heavy production work to be performed by robots and machines, for a safer and more efficient working environment. Makron automation also improves accountability, production reporting, and preventive maintenance. We can support you wherever you are located with our remote access systems. We offer you our industrial automation expertise as individual services or together with our machine manufacturing service. We have over 30 industrial automation professionals ready to help.

ELECTRICAL INSTALLATIONS

Installation is typically a part of a delivery project. All our electrical installations are performed by a professional electrician before we commission the production machines and lines. Our offering consists of range of installations required for industrial electricity and instrumentation, including field installation and installation supervision. We offer electrical installations and installation supervision as a service all over the world.

What Makron does

Our professionals have the competence and know-how to install the manufactured machinery fast, efficiently and safely. Some electrification can be pre-installed in manufacturing and completed on-site. Our experienced electricians can also act as project supervisors.

Products & expertise

- Industrial electricity installations
- Instrumentation installations
- Field electricity installations
- Supervision of electrical installations
