DRY AND WET WASTE TREATMENT

MARINE INDUSTRY

Subcontracting automation, engineering, and machine manufacturing for the marine industry.

Makron supports your technology needs as an engineering, automation and manufacturing subcontractor. Makron is an expert in heavy fabrication and can manufacture steel structures for the marine industry. We also offer automation expertise to marine technology companies working with waste and wastewater treatment systems. For automation systems, Makron covers your needs completely from planning to programming, to electric control cabinet manufacturing and commissioning.

DRY AND WET WASTE TREATMENT

Dry and wet waste treatment systems manage mixed or recyclable waste in a way that is safe, environmentally friendly, and energy efficient by reducing its volume through compaction, shredding, and burning. We offer automation as a subcontractor to technology providers. And as your partner, we use automation to complete your dry and wet waste treatment processes.

What Makron does

We cover all automation steps in your technology process and manufacture the electrical control cabinets and systems.

Products & expertise

- Electrical engineering
- Programming
- Electrical control cabinets
- Spare parts
- Commissioning
