WASTEWATER TREATMENT

MARINE INDUSTRY

Subcontracting automation, engineering, and machine manufacturing for the marine industry.

Makron supports your technology needs as an engineering, automation and manufacturing subcontractor. Makron is an expert in heavy fabrication and can manufacture steel structures for the marine industry. We also offer automation expertise to marine technology companies working with waste and wastewater treatment systems. For automation systems, Makron covers your needs completely from planning to programming, to electric control cabinet manufacturing and commissioning.

WASTEWATER TREATMENT

Wastewater treatment systems separate and neutralize organic contaminants in wastewater to comply with national and international legislation. Our offering to technology providers includes automation for biological and electrolytic wastewater treatment plants that refine black and gray water, as well as grease separators to separate grease from kitchen and galley wastewater. We offer automation services as a subcontractor to the waste technology providers.

What Makron does

We ensure your wastewater treatment process is done automatically, correctly and completed with efficiency as your partner. Our automation solutions help optimize wastewater treatment for each vessel. We also offer you mechanical engineering and machine manufacturing for the process.

Products & expertise

- Electrical engineering
 - Programming
 - Electrical control cabinets
 - Mechanical engineering
 - Spare parts
 - Equipment manufacturing
 - Commissioning
