

Mechanical Wood Industry

# WOOD-BASED PANEL BOARD LINES

# MECHANICAL WOOD INDUSTRY

Your subcontracting partner for machine manufacturing, mechanical engineering and industrial automation.

Wood is a versatile material that's easy to process for products in the construction industry and the energy sector. Whether you need to make sawn timber, plywood, MDF, OSB or partial board and pellets, you need efficient processes and machines. As your subcontractor, we manufacture the machinery you need based on your drawings. On top of this, we offer you our industrial automation and mechanical engineering services.

---

## WOOD-BASED PANEL BOARD LINES

When the pressed panel board arrives at the line it is trimmed, cooled, stacked and stored. The board is then sanded and cut to the correct dimensions. The finished panel board is conveyed through automatic quality control and then put in storage. From storage the stacks are packed and delivered to the customer. As your subcontracting partner, we manufacture production lines and machinery for MDF, partial board, plywood production and OSB, according to your drawings.

### What Makron does

Based on your drawings, we manufacture everything needed to treat wood-based panel boards: with lines including conveyors, saws, and stacking and storing equipment, all completed with mechanical engineering and automation.

### Products & expertise

- MDF lines
- Partial board manufacturing lines
- Plywood manufacturing lines
- OSB lines
- Conveyors
- Electrical control cabinets
- Automation engineering
- Electrical engineering
- Electrical installations
- Mechanical engineering
