

**MAKRON**  
A Promise to Complete.

Paper Industry  
**REELING**

# PAPER INDUSTRY

**We manufacture machinery and equipment for machinery technology providers in the paper industry.**

The paper industry uses wood as a raw material to manufacture paper-based products. Paper-based products are found in everyday life at home and at work. These products are used as solid and liquid food containers, paper sheets, documents and magazines, and in various other packaging products. The pulp and paper industry regularly use nanotechnology, meaning that together they are also the world's largest nanotechnology industry. For this huge business area, Makron manufactures machinery for wood handling systems, and reeling and paper roll handling phases, either as a subcontractor or a contract manufacturer.

## REELING

It is important to complete the paper reeling process efficiently. According to your design, Makron will manufacture the machines needed to efficiently complete your reeling process. The paper is reeled and cut to the correct width so that it is ready for after treatment.

### What Makron does

We manufacture the machines that are needed in the reeling process according to your drawings, and complete them with Makron automation services.

### Products & expertise

- Reel manufacturing
- Conveyors
- Electrical control cabinets
- Automation engineering
- Electrical engineering
- Electrical installations
- Mechanical engineering
