

MAKRON

Paper Industry

REELING

PAPER INDUSTRY

Complete contract manufacturing services for machinery technology providers in the paper industry.

Paper-based products are found in everyday life at home and at work. These products are used as solid and liquid food containers, paper sheets, documents and magazines, and in various other packaging products. The pulp and paper industry regularly use nanotechnology, meaning that together they are also the world's largest nanotechnology industry. For this huge business area, Makron offers complete contract manufacturing services. We manufacture machinery for reeling and paper roll handling phases as a subcontracting partner and provide conveyor solutions as well as engineering and automation services.

REELING

It is important to complete the paper reeling process efficiently. The paper is reeled and cut to the correct width so that it is ready for after treatment. According to your design, Makron will manufacture the machines needed to efficiently complete the reeling process, and provides engineering and automation services as your subcontracting partner.

What Makron does

We manufacture the machines that are needed in the reeling process according to your drawings and complete them with Makron automation services.

Products & expertise

- Mechanical engineering
 - Automation engineering
 - Electrical engineering
 - Machine manufacturing
 - Conveyor manufacturing
 - Electrical control cabinets
 - Electrical installations
