

Paper Industry

WINDERS AND ROLL HANDLING

PAPER INDUSTRY

Complete contract manufacturing services for machinery technology providers in the paper industry.

Paper-based products are found in everyday life at home and at work. These products are used as solid and liquid food containers, paper sheets, documents and magazines, and in various other packaging products. The pulp and paper industry regularly use nanotechnology, meaning that together they are also the world's largest nanotechnology industry. For this huge business area, Makron offers complete contract manufacturing services. We manufacture machinery for reeling and paper roll handling phases as a subcontracting partner and provide engineering and automation services.

WINDERS AND ROLL HANDLING

Winders and roll handling machines are an essential part of paper production. These machines complete the production process by packaging the reels and ensuring they are ready for transportation. Makron manufactures the machinery as a subcontractor of technology providers. We complete their functionality with our industrial automation and engineering services.

What Makron does

We manufacture winders and roll handling machines based on your engineering and design. We also manufacture electrical control cabinets and offer complete automation services.

Products & expertise

- Mechanical engineering
 - Automation engineering
 - Electrical engineering
 - Machine manufacturing
 - Conveyor manufacturing
 - Electrical control cabinets
 - Electrical installations
