# PRODUCTION

**World-class machine manufacturing for medium and heavy machinery industries in project business, with ISO 3834-2 certification for welding operations.**

Makron production means high-quality expertise. We are your one-stop solution provider in machine manufacturing. We handle different projects from your designs and drawings to a complete working product. We have factories in Hollola, Finland and Aruküla, Estonia. Our Automation electrical control cabinet factory is located in Hollola Finland. Working together with Makron means you have the expertise and professionals providing you with the best possible service. In our production facilities, we have 150 people working in 2–3 shifts. Our Hollola factory includes five spacious halls sized 21–28 x 100 meters and cranes with a lifting capacity of 75 tons, and we can even fit 7.7 meter wide and 7.0 meter high work pieces in the production hall.

We value the quality of our work and therefore we thoroughly document production. We are able to obtain all the needed parts, components and materials for you. We are happy to take complete responsibility for the supply chain, to stay on schedule and get the necessary components on time. Our work plans ensure that every step of the process is planned carefully. During the production process we will also report on our progress, step-by-step, to keep you up-to-date. And we constantly develop our products and production processes. We appreciate hands-on partnership where we learn from each other to make projects more efficient and products better.

---

# SURFACE TREATMENT

We perform different types of surface treatment from steel grit blasting to high-quality painting. We have blasting lines where completion can be done to create a clean and smooth product surface according to specifications. Makron is equipped with spacious painting halls which are suitable for large steel frame wet painting.

## What Makron does

We employ 7 surface treatment professionals and we have excellent facilities for high-quality surface treatment. In our painting hall, the surface of the product can be specially finished, for example to meet corrosion resistance requirements. We can perform multiple wet paintings for demanding structures. In these situations, the end-product will have a surface treatment of 40–700 µm thick. We document each surface treatment digitally so you can trust the quality of the end-product. We finish your product surfaces according to precise field standards.

## Machinery & Services

- Steel grit blasting
  - Wet painting
